

No 1

**deciding factor
when selecting a
holiday park is a
strong internet
connection**

No matter where you live in the country, everyone deserves better internet, whether at home or enjoying valued time at leisure parks.

At Voneus we pride ourselves in delivering superfast broadband to homes, businesses and holiday parks across both England and Wales.

Voneus Broadband

Broadband is the top priority for guests choosing a Holiday Park

By not having sufficient broadband capabilities in place, you could be significantly missing out on bringing visitors through the gates during the busiest parts of the year by failing to invest properly in this vital utility.

Superfast Broadband at no cost to you*

At Voneus, we take pride in delivering an end-to-end solution for owners of leisure parks at zero cost to park owners for all standard installs.

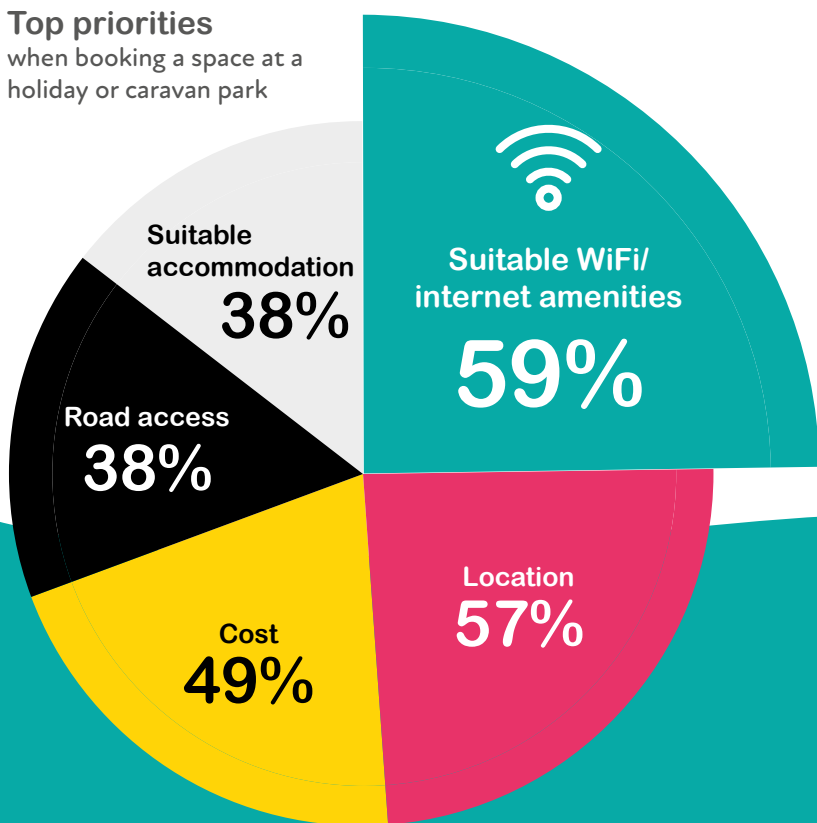

Once installed, we deal directly with your guests to install their own personal connection direct to their premise. This provides guests with their own personal, secure, and fast connection.

Income boost

The growing demand for sufficient internet access on holidays could mean a boost in income, with 83% of guests from our recent survey stating they would pay additional costs to stay on a site with a strong connection. Numbers you can't afford to ignore.

Top priorities

when booking a space at a holiday or caravan park

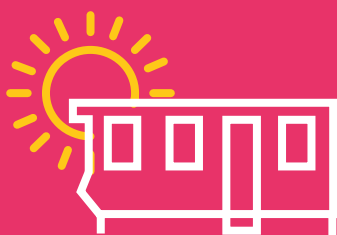

47%

of people watch streaming services or sport online while staying at a caravan or holiday park.

42%

opted for the site with better broadband services when picking between two sites to stay at.

Our survey of 3,000 holiday makers who have visited a caravan or holiday park in the UK within the last five years named reliable broadband as their top priority, followed by site location and cost.

3 Broadband Solutions

Broadband direct to premise

Our unique solution provides your guests with a superfast, secure broadband connection direct to their property, just like they would at home.

This encourages guests to stay longer in their property with the knowledge of being able to stream TV, films and sport, enjoy a smooth online gaming experience and even work with superfast connectivity.

Public WiFi

For tourers and guests we also offer public WiFi solutions for tourers and guests to log on and use the internet which come with a fully functioning voucher system and payment solution.

Leisure park requirements

Bespoke solutions for your office, café and CCTV.

A simple, fuss free process

Step 1

Contact our specialist team so we can talk through your requirements and discuss what broadband options are available.

Step 2

Our design team will visit your park to survey and design a network and scope out the level of work required.

Step 3

Once the survey is completed, your personal account manager will confirm the best solution for installing the broadband connection, which will have minimal disruption to the park's occupants and the equipment will totally blend in with the park's aesthetics.

Step 4

Once the scope and timing of works are agreed, a commercial agreement will be signed by both parties, and we will agree the installation of your network.

Step 5

Once live and tested, we will take responsibility to promote and provide marketing and arrange individual contracts and installations direct with your guests.
